India UAV Market (2015-2021): Market Forecast by UAV Types (Mini-UAV (Low Altitude – Low Endurance), Medium Range UAV (Low Altitude – Medium Endurance), Long Range UAV (Medium Altitude – Long Endurance) and Long Range UAV (High Altitude – Long Endurance)) and Applications (Military, Law Enforcement, Events and Others)

“India Unmanned Aerial Vehicle (UAV) Market (2015–2021)” provides in-depth analysis with 74 figures and 13 tables covered in 140+ pages.

Increasing terrorist activities, border security, rising defense budget, FDI, favorable government policies on import and increased domestic production campaigning for defense aircrafts and military equipment have driven the penetration of UAVs in the Indian market. After China and Japan, India is emerging as one of the key markets for UAVs in Asia-Pacific region. India is also one the largest importers for defense equipment worldwide. After the introduction of “Make in India” campaign by the Government of India in 2014, India is anticipated to commence the production of various defense equipment in the coming years due to surging FDIs in defense sector and growing partnerships.

In India’s UAV market, long range UAV with medium altitude & long endurance segment dominates the overall market in revenue terms. According to 6Wresearch, India UAV Market is projected to record \$421 Million by 2021. Expected introduction of regulation by DGCA in 2016 would promote its penetration in civil application sector, retail and hospitality application sectors.

Amongst all applications, military application accounts for majority of the revenue share

in India's UAV market. Over the last three years, law enforcement application is witnessing higher deployment of mini-UAVs in Tier-I cities, on account of increasing crime rate. Furthermore, before the ban on the use of UAVs for civil application by Directorate General of Civil Aviation (DGCA), mini-UAVs were used in events and photography.
