Amongst all South-East Asian countries, Indonesia is emerging as one of the key countries, which has registered growth across all industry verticals in last few years. With growth of infrastructures in Indonesia, demand for air conditioners have increased, especially in commercial and residential applications.

Indonesia is the leading air conditioner market in Southeast Asian region. Led by rising investments, public & private infrastructure developments and government plans such as 20 Years Development Plan and Master Plan, which would drive government spending in various sectors such as housing, infrastructure, commercial, hospitality, manufacturing, education and healthcare.

According to 6Wresearch, Indonesia's Air Conditioner market is projected to grow at a CAGR of 10.6% during 2016-22. In 2015, Indonesian air conditioner market declined due to weak economic conditions, lower investments and devaluation of country's currency. Further, the market demand was also affected due to elections held in the country.
