After South Africa, Nigeria is the second largest market of video surveillance systems in Sub-Saharan region. The country has exhibited potential growth during 2010-12 owing to government projects pertaining to installation of various electronic security systems in Lagos and Abuja.

According to 6Wresearch, Nigeria's video surveillance market is projected to grow at a CAGR of 5.3% during 2016-22. In Nigeria's video surveillance market, analog video surveillance systems have captured key share of the market pie. However, a shift towards IP video surveillance systems is anticipated through the forecast period.

Nigeria's video surveillance market declined in 2015 on the back of slumping global oil prices and weak economic conditions. Further, several projects were on hold due to elections in the country, which affected the growth of the market. However, market conditions are expected to improve from 2016 onwards.

Amongst all verticals, government & transportation vertical has generated majority of

the market revenues. Industrial & manufacturing vertical is another key emerging vertical, wherein oil & gas sector is the leading contributing segment.

The report thoroughly covers video surveillance market by types, components, verticals and regions. The report provides an unbiased and detailed analysis of the on-going trends, opportunities/high growth areas, market drivers which would help the stakeholders to decide and align their market strategies according to the current and future market dynamics.
