Rising construction activities of various public & private infrastructures in the areas of retail, hospitality, transportation, and business parks have fueled the market for air conditioners in Saudi Arabia. Additionally, with surging residential projects and construction & expansion of airport and metro is anticipated to surge the future demand for air conditioners.

According to 6Wresearch, Saudi Arabia's Air Conditioner market is projected to grow at a CAGR of 7.42% during 2015-21. In Saudi Arabian market, centralized, split and window type ACs have together captured majority of the market share in 2014 and would lead through the forecast period; however, share of window AC is expected to decline in the coming years.
