Saudi Arabia Construction Equipment Market (2017-2022): Market Forecast by Equipment Types (Mobile Crane, Earthmoving Equipment (Motor Grader, Excavator and Loaders), Material Handling Equipment (Telescopic Handlers and Forklifts), Aerial Work Platform (Articulated Boom Lifts, Telescopic Boom Lifts and Scissor Lifts), Crawler Dozers and Dump Truck), Verticals (Construction, Energy Utilities and Metal & Mining) and Regions (Central, Eastern, Western and Southern) and Competitive Landscape

Saudi Government initiatives for economic diversification, proposed residential and commercial projects and expansion of public infrastructure including metro and airports are expected to drive the construction equipment market in Saudi Arabia in the coming years. Tourism, healthcare, residential and transport sectors would be the key focus areas for the development in the Kingdom. However, the market declined majorly in 2015 & 2016 due to slowdown in the construction sector. The slowdown was recorded owing to lower government spending on account of declining oil prices which halted or delayed several infrastructure projects.

According to 6Wresearch, Saudi Arabia construction equipment market is projected to grow at a CAGR of 3.1% during 2017-22. Though, the market declined in last two years, but is anticipated to bounce back post 2018. In 2016, earthmoving equipment captured major share in the overall market followed by material handling equipment and cranes.

Amongst all the verticals, the construction vertical accounted for key market share and is expected to dominate in the forecast period due to growing investments in the country.
