SUMMARY

Animal Growth Promoters are feed additives that used to help increase the efficiency of animal production by increasing weight gain and product output. Animal Growth promoters can be classified into four groups; those that increase growth and also increase feed consumption, those that increase growth without altering feed consumption, those that do not alter growth but decrease feed consumption (generally referred to as the feed consumption ratio; $FCR = \text{kg feed consumed} / \text{kg body weight}$), and those that increase growth and decrease feed consumption.

The global Animal Growth Promoter market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
