### SUMMARY

An automatic transfer switch (ATS) is a device that automatically transfers a power supply from its primary source to a backup source when it senses a failure or outage in the primary source. When a failure occurs in a primary power system, the ATS invokes a standby power source, such as an uninterruptable power supply. An ATS can also start up more long-term backup power systems, such as local diesel generators, to run electric equipment until utility power is restored.

The global Automatic Transfer Switches market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
