SUMMARY

Automotive Front End Module is consists of building the automotive front end off line, and installing the entire module as one complete assembly on the vehicle rather than building up the front end vehicle component by component. The Front End Module is the aggregate of components located in its front part which carry out many functions (esthetical, structural, aerodynamically, engine cooling, and safety) and which are preassembled as subassembly ready to be installed into the vehicle. The Front End Module included many components, such as Radiator, Condenser, Core Support, Headlight, Front Grill, Bumpers, Fenders, Crash Management System, and Others.

The global Automotive Front End Module market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
