SUMMARY

Solar control glass is specially treated glass which is designed to keep car interiors comfortable by preventing the buildup of solar heat. Solar control glass is not necessarily coloured or mirrored glass, although such finishes can be applied for aesthetic purposes if desired. It incorporates invisible layers of special materials on the glass which have the dual effect of allowing sunlight in, while repelling solar heat. Solar control glass units are typically doubleglazed, which means they also insulate well.

The global Automotive Solar Control Glass market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
