### SUMMARY

Awning fabrics are very different from other textiles. They have an advanced set of properties which allow them to withstand annual changes in temperature, along with the other challenges posed by life outdoors, including UV lightening and damage caused by rain or dirt. They are strong enough to resist tearing effectively, even on seams and hems, and stay taut despite being opened and closed thousands of times.

The global Awnings Fabric market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
