SUMMARY

Decision makers worldwide are under tremendous pressure to optimize their business operations, acquire new customers, and increase their market share, thereby driving long-term profitability. Business analytics is used for strategic decision making, enabling organizations to understand their customers, optimize operational cost, and improve business efficiency and competitiveness. The demand for regulatory compliance and transparency is high across sectors such as BFSI and healthcare. Enterprises in these sectors need to comply with regulatory norms such as Basel III and Solvency II. Business analytics outsourcing helps enterprises address such compliance requirements by increasing their transparency. The adoption of systems such as ERP, CRM, SCM, and SFA by enterprises and the industrial Internet revolution have led to the generation of large volumes of data. Moreover, with the increased adoption of big data, the use of business analytics has also surged with a greater need to understand data. Data analytics tools and technologies help derive powerful insights and make efficient use of big data. This helps organizations make strategic decisions based on actionable insights for their business activities.

The global BPO Business Analytics market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
