SUMMARY

Charcoal is a woodfuel consumed in cities and towns. Some of the factors influencing the choice of using charcoal instead of firewood in urban areas include: Charcoal has a higher calorific value per unit weight than firewood, it is therefore more economical to transport charcoal over longer distances as compared to firewood; Storage of charcoal takes less room as compared to firewood; Charcoal is not liable to deterioration by insects and fungi which attack firewood; Charcoal is almost smokeless and sulphur – free, as such it is ideal fuel for towns and cities.

The global Charcoal market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
