SUMMARY

This report studies the Insulators market. Insulators are used in electrical equipment to support and separate electrical conductors without allowing current through themselves. An insulating material used in bulk to wrap electrical cables or other equipment is called insulation. The term insulator is also used more specifically to refer to insulating supports used to attach electric power distribution or transmission lines to utility poles and transmission towers. They support the weight of the suspended wires without allowing the current to flow through the tower to ground.

The global Insulators market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
