### SUMMARY

A junction box is an enclosure that protects a connection (the junction) of two or more wires carrying electrical current. This level of protection is needed to prevent fires and to maintain solid, reliable connections that stay tight over many years. The use of junctions removes the need to run a wire from every outlet or switch back to the main service panel.

The global Junction Box market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
