SUMMARY

Starter cultures develop color and flavor and provide safety. The addition of any commercial culture to the sausage mix provides a safety hurdle, as those millions of freshly introduced bacteria start competing for food (moisture, oxygen, sugar, protein) with a small number residing in meat bacteria, preventing them from growing. It may be called a biological competition among bacteria.

The global Meat Starter Culture market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
