SUMMARY

Nylon cable tie is a type of fastener most made of nylon resin for holding items together. They are widely used in industry and daily life because of their reasonable price and ease of use. Nylon cable tie has one-piece injection moulded construction, provides maximum strength and adjustability and rounded edges and bent-tip design make installation easy, especially for binding several electronic cables or wires together and to organize cables and wires. Frequently used in electronics and electrical applications for secure and safe routing of cables and wire harnesses, these injection molded cable ties feature one-piece construction to produce a strong and highly reliable wrap. Once applied, the permanent locking feature of the cable ties assures a tight and secure hold.

The global Nylon Cable Ties market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
