### SUMMARY

An optical distribution frame (ODF) is a frame used to provide cable interconnections between communication facilities, which can integrate fiber splicing, fiber termination, fiber optic adapters & connectors and cable connections together in a single unit. It can also work as a protective device to protect fiber optic connections from damage. The basic functions of ODFs provided by today's vendors are almost the same. However, they come into different shapes and specifications.

The global Optical Distribution Frame market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
