### SUMMARY

Optical Fiber Polarizers are placed inline to improve the extinction characteristics of fiber optic cable. They allow the transmission of only one polarization, blocking light in unwanted polarization states. Fiber optic polarizers are used because degradation in polarization extinction can cause noise interference and limit the performance of the entire fiber optic system.

The global Optical Fiber Polarizer market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
