SUMMARY

There are two main categories of hair dye based on their chemical composition; oxidative (permanent hair dye) and additive (semi -permanent / temporary hair dye). For permanent hair colouring, substances are added to open the cuticle so the dye can penetrate the hair shaft. In this way the colour changes remain while the hair grows. Permanent hair colour contains three main components of aromatic amines (dyes), a coupling agent and an oxidant, and the process can be divided into three step
