SUMMARY

Peony is a flowering plant in the genus *Paeonia*, the only genus in the family *Paeoniaceae*. Peony varieties with huge, double flowers will be the focal point of the garden when they bloom in early summer. Single-flowered types are more subtle and combine well with other perennials. Flower colors include pink, red, white, and yellow, and the plants grow 18 inches to 3 feet tall, depending on the variety. Peonies make an attractive low hedge. However, they can take up to 3 years to mature, and don't perform well in hot summer climates.

The global Peony market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
