### SUMMARY

Plastic waste management is a collective term for various approaches and strategies used to recycle plastic materials that would otherwise be dumped into landfills, or bodies of water, or otherwise contaminate the environment. The idea behind this type of waste management is to utilize those discarded materials to manufacture new plastic products without the need to actually generate additional plastic materials. Doing so can help lower production costs as well as protect the environment.

The global Plastic Waste Management market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
