SUMMARY

Working in any type of industrial environment can pose potential risks to employees' vision. Machinery, chemicals, sparks or metal fragments can damage eyes irreparably. Safety glasses help keep eyes safe out in the field, on construction sites, in labs and in any other place where eyes may come in contact with foreign materials. Safety eyewear must conform to a higher standard of impact resistance than regular eyeglasses, which optical professionals sometimes call 'dress eyewear.'

The global Safety Glasses market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
