SUMMARY

Specialty tires are designed for specific weather conditions or specific vehicles. This report covers agriculture tires, OTR Tire and other tires. Agriculture tires generally refer to tires equipped on agricultural machinery and vehicles. As the working conditions are different, the features and specifications of agriculture tires are not same to tires for common vehicles. OTR Tires (Off-the-road tires) are utilized for large-scale machinery at construction and mining and other sites with no roads. These tires mainly made with premium casings and durable compounds. Off-the-road tires offer substantial support for machinery used at various civil engineering sites, including ultra-large dump trucks, earth and gravel at mining and dam construction sites, bulldozers for earth removal and graders for road construction and snow removal.

The global Specialty Tire market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
