SUMMARY

The concept of recovering oil by surfactant flooding dates back to 1929 when De Groot was granted a patent claiming water-soluble surfactants as an aid to improve oil recovery. Currently, surfactant flooding boosts oil production by lowering interfacial tension, increasing oil mobility thus allowing better displacement of the oil by injected water. Surfactant EOR improves the wettability of porous rocks allowing water to flow through them faster displacing more oil.

The global Surfactant for EOR market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
