### SUMMARY

Terrazzo originated in Italy, where marble-workers would take the crumbs of their work home, mix them with cement and create faux-stone floors for their terraces. Since then, terrazzo floors have grown into an art form all their own with a wide range of styles and possibilities. Classic terrazzo is a mixture of marble fragments, called the aggregate, and a cementations binding agent, called the matrix. It is resilient and can be used inside and outside and it can be cast in place or laid in manufactured tiles.

The global Terrazzo Flooring market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
