SUMMARY

Stud welding is a technique similar to flash welding where a fastener or specially formed nut is welded onto another metal part, typically a base metal or substrate. The fastener can take different forms, but typically fall under threaded, unthreaded or tapped. The bolts may be automatically fed into the spot welder. Weld nuts generally have a flange with small nubs that melt to form the weld.

The global Weld Studs market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
