SUMMARY

The erosion and corrosion of wind towers and blades is not a surprise given the variety of and often harsh environmental conditions encountered at sea and on land. If not protected, this erosion and corrosion will reduce the structure's strength, reliability, life span and, ultimately, its economic value. So coating plays an important role in protecting blades, tower and other components from environment.

The global Wind Power Coating market is expected to reach xxx Million USD by 2025, with a CAGR of xx% from 2020 to 2025.
