## **Abstracts**

### **SUMMARY**

Greenhouse horticulture is the process of producing agricultural crops within a structured shelter so as to provide customized growing conditions to the crops. The majority of greenhouse structures are made from plastic followed by glass and other materials. It facilitates the protection of crops from diseases, pests, and various negative weather conditions. Greenhouse horticulture production has many benefits over conventional crop production techniques and provides safer and healthier food. This is one of the major positive factors leading to an increased demand for greenhouse horticulture.

The report forecast global Greenhouse Horticulture market to grow to reach xxx Million USD in 2019 with a CAGR of xx% during the period 2020-2025 due to coronavirus situation.

The report offers detailed coverage of Greenhouse Horticulture industry and main market trends with impact of coronavirus. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading Greenhouse Horticulture by geography. The report splits the market size, by volume and value, on the basis of application type and geography.

First, this report covers the present status and the future prospects of the global Greenhouse Horticulture market for 2015-2024.
