## **Abstracts**

### **SUMMARY**

Solder, a fusible metal alloy, is used to create a permanent bond between metal workpieces. As solder must be melted in order to adhere to and connect the pieces together, a suitable alloy for use as solder will have a lower melting point than the pieces it is intended to join. Besides, whenever possible, the solder should also be resistant to oxidative and corrosive effects that would degrade the joint over time. The report forecast global Solder market to grow to reach xxx Million USD in 2020 with a CAGR of xx% during the period 2020-2025 due to coronavirus situation.

The report offers detailed coverage of Solder industry and main market trends with impact of coronavirus. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading Solder by geography.
