## **Abstracts**

### **SUMMARY**

Welded Metal Bellow are manufactured by welding a number of individually formed diaphragms to each other. The comparison between the two bellows types generally centers on cost and performance. Hydro formed bellows generally have a high tooling cost, but, when mass-produced, may have a lower piece price. However, hydro formed bellows have lower performance characteristics due to relatively thick walls and high stiffness. Welded metal bellows are produced with a lower initial tooling cost and maintain higher performance characteristics. The drawback of welded bellows is the reduced metal strength at weld joints, caused by the high temperature of welding.

The report forecast global Welded Metal Bellow market to grow to reach xxx Million USD in 2020 with a CAGR of xx% during the period 2021E-2026F due to coronavirus situation.
