SUMMARY

Sand paper or abrasive paper is generic names used for a type of coated abrasive that consists of sheets of paper with abrasive material glued to one face. Despite the use of the names neither sand nor glass are now used in the manufacture of these products as they have been replaced by other abrasives. Sand Paper is produced in different grit sizes and is used to remove small amounts of material from surfaces, either to make them smoother (for example, in painting and wood finishing), to remove a layer of material (such as old paint), or sometimes to make the surface rougher (for example, as a preparation for gluing).

The report forecast global Abrasive Paper market to grow to reach xxx Million USD in 2020 with a CAGR of xx% during the period 2020-2025.

The report offers detailed coverage of Abrasive Paper industry and main market trends. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading Abrasive Paper by geography.
