Abstracts

SNAPSHOT

Aluminium conductor steel-reinforced cable (ACSR) is a type of high-capacity, high-strength stranded conductor typically used in overhead power lines. It is concentrically stranded conductor with one or more layers of hard drawn 1350-H19 aluminium wire on galvanized steel wire core. The core can be single wire or stranded depending on the size. Steel core wire is available in ACSR, ACSR/TW or ACSR/AW for corrosion protection. Additional corrosion protection is available through the application of grease to the core or infusion of the completed conductor with grease.

This report covers ACSR basic market data by segment:

- 1 by Product
- 2 by End-User
- 3 by Company
- 4 by Region
- 5 by Channel
- 6 by Price

This report can also be customized according to further requirements.
