Snapshot

The network traffic patterns have dramatically changed in the past decade from transaction-oriented applications to bandwidth-intensive applications, supporting ERPs, video, voice and unstructured data. The new advent of virtualization, cloud-computing, and big-data has augmented the demand for highly efficient and secure corporate networks. The biggest challenge for enterprises today is to combat the tough competitive environments, while enhancing their productivity. Enterprises are now emphasizing on ensuring security and quickly responding to the changing business needs; thereby optimizing and securing the flow of data, to all users, on all networks, while also helping in sustainable competitive advantage.The Application Delivery Network technology deals with the demand for greater application mobility and security in a distributed enterprise. ADN helps in classifying and prioritizing applications, content, and user access in real-time. It helps in acceleration of internal, external, and real-time applications across distributed enterprises. The technology also helps in securing information from malicious applications and content, while delivering fast, secure, and available applications across the enterprise, while controlling the rising network management costs. Application Performance Monitoring (APM), WAN optimization, and secure web gateway technologies are combined together by ADN to give a complete

visibility and control over user and application performance. Due to this, critical applications and information can be delivered for business needs.GIR expects an increasing adoption of ADN solutions, as major vendors are rigorously working towards building cost-effective solutions, in an effort to reduce the overall cost incurred by end-users. The total market is expected to grow from $4.53 billion in 2016 to $8.25 billion by 2021, at an estimated Compound Annual Growth Rate (CAGR) of 12.4% from 2016 to 2021

The global Application Delivery Networks (AND) market will reach xxx Million USD in 2018 and with a CAGR if xx% between 2019-2025.

Product Type Coverage (Market Size & Forecast, Major Company of Product Type etc.):

Application delivery controllers (ADC)
