

Global Automotive Heat Shield Market Data List by Segment 2015-2022

<https://marketpublishers.com/r/G64DB20AFCAEN.html>

Date: November 2017

Pages: 25

Price: US\$ 800.00 (Single User License)

ID: G64DB20AFCAEN

Abstracts

SNAPSHOT

A heat shield is designed to shield a substance from absorbing excessive heat from an outside source by either dissipating, reflecting or simply absorbing the heat. It is often used as a form of exhaust heat management. Due to the large amounts of heat given off by internal combustion engines, heat shields are used on most engines to protect components and bodywork from heat damage. As well as protection, effective heat shields can give a performance benefit by reducing the under-bonnet temperatures, therefore reducing the intake temperature. Heat shields vary widely in price, but most are easy to fit, usually by stainless steel clips or high temperature tape.

This report covers Automotive Heat Shield basic market data by segment:

- 1 by Product
- 2 by End-User
- 3 by Company
- 4 by Region
- 5 by Channel
- 6 by Price

This report can also be customized according to further requirements.
