## Abstracts

### Summary

Awning fabrics are very different from other textiles. They have an advanced set of properties which allow them to withstand annual changes in temperature, along with the other challenges posed by life outdoors, including UV lightening and damage caused by rain or dirt. They are strong enough to resist tearing effectively, even on seams and hems, and stay taut despite being opened and closed thousands of times.

This report describes the development of the industry by upstream & downstream, industry overall and development, key companies, as well as type segment & market application and so on, and makes a scientific prediction for the development industry prospects on the basis of analysis, finally, analyzes opportunities for investment in the industry at the end of the report.
