In this report is a biologic defined as proteins, peptides, hormones or antibodies drugs production by bio-engineered technology, but does not include a vaccine. A biosimilar in this report is a biologic medical product which is copy of an original product that is manufactured by a different company. Biosimilars are officially approved versions of original “innovator” products, and can be manufactured when the original product's patent expires.

The global Biologics and Biosimilars market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.
