SNAPSHOT

Caster is a wheeled device typically mounted to a larger object that enables relatively easy rolling movement of the object. Circular shielding components, assembled on the sides of a wheel to protect the hub from threads and other foreign objects, which may prevent free rotation of the wheel. Casters are found virtually everywhere, from office desk chairs to shipyards, from hospital beds to automotive factories. They range in size from the very small furniture casters to massive industrial casters, and individual load capacities span 100 lbs or less to 100,000 lbs. Wheel materials include cast iron, plastic, rubber, polyurethane, forged steel, stainless steel, aluminum, and more. This report mainly covers the Casters product Swivel Caster, Rigid Caster type, while we can also offer any product survey report related to the Casters industry chain.

The global Casters market size is estimated at xxx million USD with a CAGR xx% from 2016-2020 and is expected to reach xxx Million USD in 2021 with a CAGR xx% from 2021 to 2026. The report begins from overview of Industry Chain structure, and describes industry environment, then analyses market size and forecast of Casters by product, region and application, in addition, this report introduces market competition situation among the vendors and company profile, besides, market price analysis and value chain features are covered in this report.
