Abstracts

SNAPSHOT

the traditional role of compounding pharmacies is to make drugs prescribed by doctors for specific patients with needs that can't be met by commercially available drugs. For example: A young child may need a small, liquid dose of a drug made only in adult-dosage tablets. A person may be allergic to one of the ingredients in the commercial version of a drug. A compounding pharmacy would make the proper dosage and form of the drug without any offending ingredients

The global Compounding Pharmacy market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.
