SUMMARY

Core HR Software products, also referred to as human resource information systems (HRISs), store employee information within a central system of record. Core HR systems are used to manage employee information, such as payroll and benefits data, within an easily accessible, centralized HR database. Companies use core HR software to maintain employee profiles, store relevant employee documents, and identify trends with a holistic view of the organization. Core HR systems are most commonly implemented in HR departments, enabling HR managers to track employee records and report key trends to management. Many core HR solutions offer self-service options so that employees can update their benefits or contact information without interrupting HR workflows. Core HR software is often implemented as part of an integrated HR management suite, or offers integrations with third-party HR applications to increase its value across multiple HR functions.

The report forecast global Core HR Software market to grow to reach xxx Million USD in 2019 with a CAGR of xx% during the period 2020-2024.
