## **Abstracts**

### Snapshot

E-paper display also known as electronic paper or electronic ink display. They are display devices that mimic the appearance of ordinary ink on paper. Unlike conventional backlit flat panel displays that emit light, electronic paper displays reflect light like paper. This may make them more comfortable to read, and provide a wider viewing angle than most light-emitting displays. An ideal e-paper display can be read in direct sunlight without the image appearing to fade.
