SUMMARY

E-prescribing or electronic prescribing is a process involving the electronic generation and sending of prescription orders for the convenience of medical practitioners or physicians, allowing them to transmit prescriptions directly from the point of care to a pharmacy. E-prescribing enhances the safety of patients and the quality of care, since there is no manual writing involved and thus there is less probability of prescription errors. In addition, e-prescribing also helps conduct security checks, encapsulate medical lists, and compile the complete historical data of a patient.

The report forecast global E-Prescribing market to grow to reach xxx Million USD in 2020 with a CAGR of xx% during the period 2020-2025.

The report offers detailed coverage of E-Prescribing industry and main market trends. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading E-Prescribing by geography. The report splits the market size, by volume and value, on the basis of application type and geography.
