## Abstracts

### SUMMARY

Earmuffs are designed for both practical and fashionable purposes through covering a person's ears. They consist of a thermoplastic or metal head-band that fits over the top or back of the head, and a pad at each end, to cover the external ears. For the most part, earmuffs are great for keeping your ears warm in cool weather without wearing a hat. Still, in certain professions such as construction, noise-reduction earmuffs are a more safety-oriented accessory than a practical, fashionable one.
