## **Abstracts**

### **SNAPSHOT**

Earthing Lightning Protection System encompasses external lightning protection, effective earthing and transient overvoltage protection (surge protection of electronic systems), etc. Lightning protection systems are the modern development of the innovation pioneered by Benjamin Franklin: the lightning rod. Today, lightning protection systems are in use on thousands of buildings, homes, factories, towers, and even the Space Shuttle's launch pad. An earthing system or grounding system is circuitry which connects parts of the electric circuit with the ground, thus defining the electric potential of the conductors relative to the Earth's conductive surface. The choice of earthing system can affect the safety and electromagnetic compatibility of the power supply.

The global Earthing Lightning Protection System market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.
