SNAPSHOT

Electric winches are most commonly used to pull an automobile, boat, crane, truck, or other piece of Machinery & Equipment from a problematic area. If a car goes off the road and down into a ravine, for example, trucks with these types of winches are used to hook the car and pull it back to the road. They can also be used to tug boats to safety. There have even been rare instances in which they have helped save large animals from tricky holes and pits.
