## **Abstracts**

### Snapshot

A Flange nut is a nut that has a wide flange at one end that acts as an integrated, non-spinning washer. This serves to distribute the pressure of the nut over the part being secured, reducing the chance of damage to the part and making it less likely to loosen as a result of an uneven fastening surface. These nuts are mostly hexagonal in shape and are made up of hardened steel and often coated with zinc.

The global Flange Nut market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.
