Snapshot

A flight management system (FMS) is a fundamental component of a modern airliner's avionics. An FMS is a specialized computer system that automates a wide variety of in-flight tasks, reducing the workload on the flight crew to the point that modern civilian aircraft no longer carry flight engineers or navigators. In many ways, it's like the GPS in your car, with waypoints programmed in between the origin and the destination. You program in where you are going, and off it goes. The FMS will allow the airplane to hook up the autopilot, and maintain the heading within a few feet. It's amazingly accurate.

The global Flight Management Systems (FMS) market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.

Product Type Coverage (Market Size & Forecast, Major Company of Product Type etc.):

Control Display Unit

Visual Display Unit

Flight Management Computer

Demand Coverage (Market Size & Forecast, Consumer Distribution):

NBA

WBA
