SUMMARY

Influenza vaccines, also known as flu shots, are vaccines that protect against influenza. A new version of the vaccine is developed twice a year as the influenza virus rapidly changes. Most provide modest to high protection against influenza; however, each year this varies. Evidence in adults over 65 years old is poor. They decrease the number of missed days of work by a half day on average. Vaccinating children may protect those around them.

The report forecast global Flu Vaccine market to grow to reach xxx Million USD in 2019 with a CAGR of xx% during the period 2020-2024.

The report offers detailed coverage of Flu Vaccine industry and main market trends. The market research includes historical and forecast market data, demand, application details, price trends, and company shares of the leading Flu Vaccine by geography. The report splits the market size, by volume and value, on the basis of application type and geography.
