## Abstracts

### SUMMARY

Forklift truck, also known as fork truck, lift truck, or forklift, are motorized vehicles primarily used for independent lifting, movement, and placement of discrete loads throughout a facility. They form an essential part of the supply chain market. These mobile loading trucks can be outfitted with forks for pallet-based unit load picking and for loads that are not palletized. These vehicles can be used with a variety of attachments such as platforms, grippers, or clamps. The growth of customer segments and rising demand for fuel-efficient vehicles is bringing a radical change to the global forklift truck market.

This report describes the development of the industry by upstream & downstream, industry overall and development, key companies, as well as type segment & market application and so on, and makes a scientific prediction for the development industry prospects on the basis of analysis, finally, analyzes opportunities for investment in the industry at the end of the report.
