Abstracts

SNAPSHOT

Diaphragm Valves (or membrane valves) consists of a valve body with two or more ports, a diaphragm, and a seat upon which the diaphragm closes the valve. The valve is constructed from either plastic or metal. Health Diaphragm Valves have the reputation of being the “clean valves”. The health diaphragm isolates the process media from the environment and all moving parts of the valve and so protecting the media from contamination while preventing it from interfering with the valve operation. The properly chosen diaphragm also provides exceptional steam resistance and long term durability.

This report covers Health Diaphragm Valve basic market data by segment:

- 1 by Product
- 2 by End-User
- 3 by Company
- 4 by Region
- 5 by Channel
- 6 by Price

This report can also be customized according to further requirements.
