## **Abstracts**

### Snapshot

A Helium Leak Sensor or Helium Leak detector is used to locate and measure the size of leaks into or out of a system or containing device. The tracer gas, helium, is introduced to a test part that is connected to the leak detector. The helium leaking through the test part enters through the system and this partial pressure is measured and the results are displayed on a meter.

The global Helium Leak Sensor market will reach xxx Million USD in 2018 and with a CAGR of xx% between 2019-2025.
